

MG SHELL STYLES

MG 00

WALL MOUNTING RECEPTACLE

MG 00 wall mounting receptacles are used to carry wires through walls or bulkheads or to provide a means of disconnection at a Bulkhead. MG 00 receptacles mate with MG 06 and MG 08 style cable mount connectors.

MG 01

IN-LINE RECEPTACLE

MG 01 cable connectors are used for cable extension requirements, where mounting provisions are unnecessary. MG 01 connectors mate with MG 06 and MG 08 style cable mount connectors.

MG 02

BOX MOUNTING RECEPTACLE

MG 02 box mounting receptacles are used in junction boxes or as an integral part of equipment. These connectors mate with MG 06 and MG 08 styles cable mount connectors.

MG 06

STRAIGHT CABLE CONNECTOR

MG 06 straight cable connectors mate with MG 00, MG 01 and MG 02 styles. MG 06 has an 'O' ring under the coupling nut, thus effecting a seal.

MG 07

JAM-NUT RECEPTACLE

MG 07 is a rear-mounted receptacle which does not require any mounting holes and screws for mounting. Only a single hole for entry of the receptacle body is required on the equipment. These come with or without rear threads, and mate with the MG 06 and MG 08 cable mount connectors.

MG 08

90° ANGLE CONNECTOR

MG 08 90° cable connectors are used where there is limited space and where wires must be brought at abrupt angles. This connector mates with MG 00, MG 01 and MG 02 styles. MG 08 has an "O" ring under the coupling nut which provides a sealing.
